

Additions to the Aculeate Hymenoptera check list 2018

Geoff Trevis

Following publication of the check list (Trevis 2017) in *Worcestershire Record* John Bingham contacted me to point out some species missing from the list. I am grateful to John for letting me know about the omissions and the species to be added to the list are given in the table below.

Species	Number of records	Date of last record	Location/Habitat	Flight period	Status
CRABRONIDAE					
Mellininae					
<i>Mellinus arvensis</i>	34	2017	Sandy localities	June – September	Widespread
APIDAE					
Anthophorinae					
<i>Epeolus cruciger</i>	10	2013	Inland heaths & moors	June – August	Widespread
<i>Eucera longicornis</i>	6	2015	Open rides in woodland	May – July	Scarce (Na)
<i>Melecta albifrons</i>	16	2017	Wide variety inc. gardens	April - June	Widespread
<i>Xylocopa violacea</i>					Rare immigrant
